Education

Stanford University *MS in Computer Science*

Sep 2024 – Mar 2026

- GPA: 3.6/4.0

University of Florida *BS in Computer Science*

Aug 2021 – May 2023

- GPA: 3.9/4.0
- Transferred in From Tufts University (Sep 2020 - May 2021)

Skills

Programming Languages: Python/CPython, JavaScript/Typescript, C/C++, SQL, Julia

Additional: GCP, AWS, React, Node, Kubernetes, Pytorch, Linux, WebAssembly

Experience

Various Companies

San Francisco, CA

Independent Contractor

Apr 2026 - present

- Develop software and data/extraction pipelines for multiple fin-tech companies across fund admin and financial research industries.

The Piech Lab at Stanford University

Stanford, CA

Research Assistant

Aug 2024 - Apr 2026

- Work with others to design, review, and deploy new features for students and teachers who use the [Code in Place](#) platform. To date, helped launch and manage 10+ distinct online CS courses, including an asynchronous public course, an accredited college course, and 4 massive, online, synchronous courses with a combined 50,000+ students and 5,000+ teachers.
- Create innovative educational systems like a [two week Python crash course for Stanford humanities professors](#) and [CS Education through WhatsApp](#).

Software Engineer

Aug 2022 – Aug 2024

- Worked on a breadth of full stack projects including, but not limited to: a forum with a GPT auto moderator, a RAG based educational chatbot, admin tools for course management, and Canvas integrations for authentication and grading. Led development of the Code in Place platform.
- Hired and helped manage full and part time software engineers, research assistants, and student developers.

Tym.so (Acq. by Roblox)

Atherton, CA

Software Engineering Intern

May 2022 – Aug 2022

- Worked on augmenting a fork of VSCode Web and utilizing the extension API to create a custom, web based IDE.
- Implemented realtime collaboration using Yjs CRDT protocol and Firebase Realtime DB.

Slater Technology Fund

Providence, RI

Summer Intern

June 2021 – Aug 2021

- Structured, developed, and built internal software for transaction logging and report automation. Used Javascript and SQL to create interface for deal logging and transaction browsing among other tools.
- Researched prospective investments and reported applications of University research for commercial use. Carried out comparison analysis on companies in the Machine learning and SaaS industries.
